PROFESSIONAL SUMMARY

Pre-final year B.Tech Computer Science student with hands-on experience in software development and strong fundamentals in Data Structures & Algorithms, DBMS, Operating Systems, and Computer Networks. Experienced in working with relational and NoSQL database systems and cloud platforms, with an interest in developing scalable, secure, and high-performance software applications.

EDUCATION

Amrita Vishwa Vidyapeetham

Bachelor of Technology in Computer Science and Engineering

- CGPA: 7.18 / 10.0 (up to 5th semester)

Coimbatore, India

Aug 2023 – Present

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript

Frameworks: Spring Boot, Node.js, Express.js, React.js

Databases: MySQL, MongoDB (NoSQL)

Libraries: Hibernate/JPA, Pandas, NumPy, Scikit-learn

Developer Tools: Git, GitHub, AWS, Azure

Concepts: Object-Oriented Programming (OOP), REST APIs, Data Structures

PROJECTS

DocPulseAI – AI Platform for Code Intelligence | *React.js, Node.js, Express.js, Azure*

Mar 2026

- Built a repository intelligence platform using AST-based analysis (Tree-sitter) to extract APIs, entities, and dependency relationships from large codebases.
- Deployed a containerized microservices architecture on Azure using ACA, ACR, Blob Storage, and PostgreSQL.

Edge Co-Intelligence System | *Python, FastAPI, YOLOv8*

Feb 2026

- Built a distributed edge inference system that parallelizes YOLOv8 detection across worker nodes.
- Designed a fault-tolerant pipeline with load balancing, retries, and worker health monitoring.
- Implemented real-time inference streaming and aggregation for low-latency object detection.

Quizora AI – Online Assessment Platform | *Java, Spring Boot, MySQL, JWT*

Nov 2025

- Developed a stateless REST API using **Spring Boot** and **MySQL** to manage the assessment lifecycle with transactional quiz distribution and automated grading.
- Secured APIs using **Spring Security** and **JWT**, implementing **RBAC** for faculty and student access control.

SnapDish – Food Delivery Platform | *React.js, Node.js, Express.js, MongoDB*

Oct 2025

- Built a full-stack food delivery platform with dynamic restaurant browsing and an admin dashboard for order tracking and revenue analytics.
- Developed RESTful backend services for order and restaurant management, handling lifecycle transitions and data aggregation.

Air Quality Forecasting System | *Python, Scikit-Learn, Random Forest, Flask*

Aug 2025

- Built a regression-based AQI forecasting model, benchmarking multiple algorithms and achieving an **R² score of 87%** using **Random Forest**.
- Performed exploratory data analysis to identify key pollutant correlations influencing AQI prediction.

INTERESTS

Data Structures & Algorithms, Backend Development, Cloud Computing
