PROFESSIONAL SUMMARY

Final-year B.Tech Computer Science student with hands-on experience in Software Development and Cloud Computing. Strong problem-solving skills in Data Structures & Algorithms, with a solid foundation in Object-Oriented Programming, Operating Systems, Database Management Systems (DBMS), and Computer Networks. Skilled in designing and developing software applications using modern technologies

EDUCATION

Amrita Vishwa Vidyapeetham

Bachelor of Technology in Computer Science and Engineering

- CGPA: 7.24 / 10.0 (up to 6th semester)

Coimbatore, India

Aug 2023 – Present

EXPERIENCE

AI/ML Intern

DRDL, DRDO

April 2026 – May 2026

Hyderabad, India

- Built a Retrieval-Augmented Generation (RAG) pipeline for scientific claim verification using dense, BM25, hybrid, and query-reformulation retrieval strategies.
- Developed automated benchmarking workflows to evaluate transformer-based NLP systems across multiple retrieval and prompting configurations.
- Conducted comparative evaluation of transformer models including DistilBERT, RoBERTa, and BART-large for zero-shot scientific claim classification.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript

Backend & APIs: Node.js, Express.js, REST APIs

Cloud & DevOps: Docker, Kubernetes, AWS, Git

Databases: MySQL, NoSQL

Frontend: React.js, HTML, CSS

Tools: GitHub, Postman

PROJECTS

DocPulseAI – Code Intelligence Platform | *React.js, Node.js, Express.js, FastAPI, Docker, Azure*

- Built a code intelligence platform that analyzes repositories using AST parsing to extract APIs, entities, dependencies, and architecture insights.
- Developed backend services and deployed a containerized microservices architecture on Azure using PostgreSQL and Blob Storage.
- Collaborated in an Agile Scrum workflow, participating in sprint planning, task tracking, and iterative feature development.

Edge Co-Intelligence System | *Python, FastAPI, Docker, YOLOv8*

- Built a distributed edge inference system for parallel YOLOv8 object detection across multiple worker nodes.
- Implemented load balancing, fault tolerance, and real-time inference processing for scalable low-latency deployment.

SnapDish – Food Delivery Platform | *React.js, Node.js, Express.js, MongoDB*

- Built a full-stack food delivery platform with dynamic restaurant browsing and an admin dashboard for order tracking and revenue analytics.
- Developed RESTful backend services for order and restaurant management, handling lifecycle transitions and data aggregation.

INTERESTS

Data Structures & Algorithms, Cloud Computing
